

DAGMAWI ANTEHUN

Backend & Full Stack Developer

+251996291651 | [E-mail](#) | [Portfolio](#) | [Github](#)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, SQL, HTML, CSS

Frameworks & Libraries: FastAPI, Node.js, Express.js, React, Prisma ORM

Databases: PostgreSQL, MongoDB, Redis, Supabase

Cloud & Tools: Google Cloud Platform, Docker, BigQuery, Looker Studio, Postman, Jupyter Notebook, Git

Concepts: REST APIs, WebSockets, JWT & OAuth2 Auth, RAG Systems, Role-Based Access Control, CI/CD

EXPERIENCE

Backend Developer – Zulu Tech

Jan 2025 – Present

Addis Ababa, Ethiopia

- ▶ Boosted API response speed by ~35% by introducing Redis caching, cutting repeated database queries for high-traffic endpoints.
- ▶ Reduced environment inconsistencies across local and staging by Dockerizing FastAPI, PostgreSQL, and Redis services, streamlining onboarding and deployment.
- ▶ Hardened backend security through JWT authentication and Redis-based rate limiting, substantially decreasing unauthorized access and API abuse.
- ▶ Delivered real-time features using WebSockets, enabling low-latency live updates that measurably improved user experience for concurrent sessions.

Full Stack Developer – AAU Gibi Gubae Portal

Dec 2024 – Jun 2025

Addis Ababa University, Ethiopia

- ▶ Engineered an administrator management subsystem for a campus fellowship portal, implementing role-based permission controls that improved administrative workflow efficiency by 40%.
- ▶ Built secure authentication and access control features that reduced unauthorized access risks by 70%, protecting sensitive student and organizational data.

PROJECTS

MarketMeda AI | AI-Powered Marketing Assistant | [Project](#)

- ▶ Developed an AI-driven platform for Ethiopian businesses that automates social media content creation and marketing campaign management at scale.
- ▶ Designed and deployed scalable data pipelines with Google BigQuery alongside interactive dashboards in Looker Studio, surfacing product performance and marketing trend insights.
- ▶ Integrated a Retrieval-Augmented Generation (RAG) system, significantly improving chatbot accuracy and contextual relevance for Ethiopian market queries.

Tech Stack: React, Vite, Tailwind CSS, Node.js, Google BigQuery, Looker Studio, LLMs

Warka | Secure E-Commerce Platform | [Project](#)

- ▶ Built a production-ready e-commerce application featuring role-based authentication, Google OAuth, and a normalized PostgreSQL database with Prisma ORM.
- ▶ Developed RESTful APIs for end-to-end product management and order processing, secured with JWT and following REST best practices.

Tech Stack: React, Node.js, Express, PostgreSQL, Prisma ORM, JWT, Tailwind CSS

EDUCATION

Addis Ababa University

Expected Graduation: June 2027

Bachelor of Science in Information Systems | **GPA: 3.70 / 4.00**

Relevant Coursework: Data Structures & Algorithms · Object-Oriented Programming · Advanced Database Systems · Computer Networking · Computer Architecture & Operating Systems · Event-Driven Programming
